

Mr. Moses,

August, 1987

I felt that the video programs we received from you were very beneficial in helping my son to remember his letter sounds. As even though it is the same programs I play (from the 2 videos received from you) the repetition of them is absorbed by the listener, even though one may or may not actually be before the T>V> screen. Just being in the same TV area (which is usually the case) helps one to hear the sounds on video and is memorized quickly.

I relate this to TV commercials and programming in which repetition of the like (the melody) is absorbed in one's mind without actually trying, and over a short period of time.

So all in all I felt it was very helpful to Michael and also his younger sister who listens with him. The tapes were also made with a lot of fun included to the lesson given and was much enjoyed at the same time as (I feel) learning should be. I would recommend the tapes highly!!

Mrs Nau
